17. Work co-operatively as a member of a team.
18. Communicate effectively in a number of forms: group discussions, oral presentation, written work and digital film and television production.
19. Comply with set deadlines.

Teaching, Learning and Assessment

The methods used to enable outcomes to be achieved and demonstrated are as follows:

Knowledge and understanding is acquired through lectures, seminars, tutorials, screenings, group work, practical workshops, independent study and work-based learning. Knowledge and understanding is also effected by demonstrations (short expositions to demonstrate skills and techniques and to establish the parameters of professional practice), master classes (expert workshops by visiting practitioners to familiarise students with current industrial practice), and showcases (opportunities taken to screen and discuss finished work and view work in progress).

Knowledge and understanding is assessed by coursework, examinations and group productions of audio-visual artefacts. Coursework includes essays of various length, reviews, individual and group presentations, individual and group critical self-evaluation, logbooks, self-reflective group portfolios, research exercises, individual work-based learning reports, dissertations. Examinations include class-tests and unseen exams. Group productions of audio-visual artefacts include photo-storyboard, factual and fictional video productions

Intellectual skills are promoted through lectures and applied by students in seminars, group work, tutorials, independent study and the production of assessments. Some or all of these skills may also be developed through reflection on work-based learning and production of audio visual artefacts.

Intellectual skills are assessed through the range of forms of assessment used on the Film Studies programme. The forms of assessment are structured over the three years of the degree to allow students to develop the ability to think independently, to formulate and research their own topics, and to build on their knowledge and interests.

Professional practical skills are acquired through lectures, seminars, tutorials, group work, the production of assessments and particularly through independent study and practice. Hands on involvement with audio-visual equipment and work based learning are particularly significant in advancing those skills. All students receive initial guidance on how to use film related information resources located in the Learning Resource Centres and or on-line how to use cameras, editing facilities and IT. All students are offered guidance on how to use specialised electronic journals and databases.

Skills are assessed through coursework (including dissertations), the production of audio visual artefacts and independent study / work based learning. Skills are also assessed through the production of short digital films of different genres and through both oral and written coursework, and examinations, throughout the curriculum.

Transferable skills are developed through seminars, group work, tutorials, independent study and work-based learning. Sustained independent learning (progressively developed in Levels 5 and 6 through the introduction of work-based learning modules and research-driven modules (Interpretation in Film, Dissertation) is supported by individual or group tutorials, individual or group supervision, and the formulation of learning agreements. Students receive induction into basic IT skills at Level 4 and are encouraged to use these skills throughout the levels. Canvas is used to support students learning on the majority of modules. Extensive guides to essay writing and research are available through the VLE.

Assessment of transferable skills is through coursework at all levels. The forms of assessment are structured over the three years of the degree to allow students to develop certain transferable skills, such as those of presentation (oral or written) and communication, collaboration, self-reflection and the skills involved in learning independently.

Programme structure - programme rules and modules

The programme is taught and assessed within the Academic Framework. Students must take 120 credits of Film Studies modules at each level of the programme (Level 4, Level 5 and Level 6). Each level of the programme should normally be completed in one academic year. Modules are of two types: Core or Option. Modules can be of 10, 20 or 30 credits.

At Level 6 there are two core modules - 6032FILM Final Film Pre-Production (10 credits) and 6033FILM Final Film Production (20 credits). Students must chose 3 modules from the following: 6030FILM World Cinema, 6034FILM Interpretation in Film, 6039FILM Black American Film and 6037FILM Work Based Learning. Each module is worth 20 credits.

Students must also chose one of the following 30 credit modules: 6035FILM Dissertation or 6036FILM Mixed Media Research Project.

All students are assigned a personal tutor when they arrive at LJMU. The personal tutor will be a member of the Film Studies teaching staff. In addition to meeting with personal tutors in induction week, students are invited to attend 2 x one-to-one meetings over the year.

Students will be offered the opportunity of study abroad at Level 5.

Option A: replacement of 60 credits of Level 5 with appropriate study abroad

The programme will offer the opportunity of 60 credits of study at Level 5. Students will be enrolled on a 360 credit honours with study abroad programme. A 60 credits Level 5 study abroad module 5030FILM will normally replace the semester 2 modules on the standard programme. This study abroad should cover the same learning outcomes as the modules being replaced. The modules to be studied in the host institution must be agreed in advance. The Level 5 mean for the final award mark will be calculated based upon the 120 credits at Level 5.

and/or:

Option B: additional study year abroad following Level 5

The programme will offer the opportunity of an additional study year abroad following Level 5. Students will be enrolled on a 480 credit honours with study abroad programme. Of those 480 credits, 120 will be taken via a Level 5 study abroad module 5031FILM. The modules to be studied in the host institution must be agreed in advance. The Level 5 mean for the final award mark will be calculated based upon the 240 credits at Level 5.

Currently we are partnered with a university in Copenhagen, where student can spend a semester at level 5. From 2016-17 we have a new partnership with San Pablo University in Madrid, Spain. We are also in discussion with the University of Connecticut.

There are other opportunities to gain work experience in Malta and China.

Information about assessment regulations

All programmes leading to LJMU awards operate within the University's Academic Framework.
<https://www.ljmu.ac.uk/about-us/public-information/academic-quality-and-regulations/academic-framework>

Opportunities for work-related learning (location and nature of activities)

Opportunities for work-related learning and work-based learning on the Film Studies programme are offered by the following modules:

The Level 4 core Film Studies module Introduction to Filmmaking offers an early glimpse of experience of the world of work. Specifically, all students have to produce fiction and non-fiction films working to a professional standard. The module - and all other practical filmmaking modules of the programme - provides ample space for other forms of

work-related learning such as role plays, simulations and on and off-campus activities. As the filmmaking modules advance in terms of skills acquired, Students often have to work with professional actors and in the

process come even closer to the work and conditions of professional production while the whole production process is designed as a simulation of a professional production process.

At level 5, students can take the Option module 'Working in Film'. Here students will develop an understanding of the working practices and organization of the British film industry on a local and national level. From a careers perspective, 'Working in Film' complements understanding of film gained on both academic and practical modules. Students' understanding of the different sectors associated with the film industry will be further developed through industry case studies that will involve completing briefs set by our industry partners. Students will be encouraged to develop an understanding of the different sectors of the local and national film industry into a recognition of the job opportunities that are presented in an area of personal career paths. The module informs students of relevant work experience opportunities in order to help create a careers portfolio.

Work Based Learning: Film Studies (Option Module)

Students are asked to secure an 80 hour long placement with a media company or organisation and report on their experience and on the company's structure in detail. Placements are arranged in discussion with a member of staff and all relevant paperwork must be completed. A member of staff will liaise with both the student and the place of work to reflect on the experience. The student will be allocated a supervisor who will guide and advise them in creating the written report. This module will comply with the LJMU Learning Code of Practice.

Programmes which are professionally accredited are reviewed by professional, statutory and regulatory bodies (PSRBs) and such programmes must meet the competencies/standards of those PSRBs.

Support for students and their learning

The University aims to provide students with access to appropriate and timely information, support and guidance to ensure that they are able to benefit fully from their time at LJMU. All students are assigned a Personal Tutor to provide academic support and when necessary signpost students to the appropriate University support services.

Students are able to access a range of professional services including:

- Advice on practical aspects of study and how to use these opportunities to support and enhance their personal and academic development. This includes support for placements and careers guidance.
- Student Advice and Wellbeing Services provide students with advice, support and information, particularly in the areas of: student funding and financial matters, disability, advice and support to international students, study support, accommodation, health, wellbeing and counselling.
- Students studying for an LJMU award at a partner organisation will have access to local support services

Methods for evaluating and improving the quality and standards of teaching and learning

Student Feedback and Evaluation

The University uses the results of student feedback from internal and external student surveys (such as module evaluations, the NSS and PTES), module evaluation questionnaires and meetings with student representatives to improve the quality of programmes.

Staff development

The quality of teaching is assured through staff review and staff development in learning, teaching and assessment.

Internal Review

All programmes are reviewed annually and periodically, informed by a range of data and feedback, to ensure quality and standards of programmes and to make improvements to programmes.

External Examining

External examiners are appointed to programmes to assess whether:

- the University is maintaining the threshold academic standards set for awards in accordance with the FHEQ and applicable subject benchmark statements
- the assessment process measures student achievement rigorously and fairly against the intended outcomes of the programme(s) and is conducted in line with University policies and regulations
- the academic standards are comparable with those in other UK higher education institutions of which external examiners have experience
- the achievement of students are comparable with those in other UK higher education institutions of which the external examiners have experience

and to provide informative comment and recommendations on:

- good practice and innovation relating to learning, teaching and assessment observed by external examiners
- opportunities to enhance the quality of the learning opportunities provided to students

Please note:

This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content, teaching, learning and assessment methods of each module can be found in module and programme guides.
