## Aims and Outcomes

### Educational Aims of the Programme

In partnership with practice and community stakeholders, the BSc Hons level the programme aims to provide: A contemporary approach to the development of the Specialist Practitioner in Community Children's Nursing who will be fit for practice, fit for purpose, fit for award and fit for professional standing. Academic rigour that meets the requirements of: LJMU; the Nursing and Midwifery Council; the Quality Assurance Agency; and the National Standards for Specialist Practice in Community Children's Nursing The resources, skills, knowledge and evidence base to change their practice by transferring their existing professional knowledge , skills attitudes and values to the community context; develop their role through working in partnership with children, young people, parents and other professionals, agencies and stakeholders; enable them to work as a Specialist Practitioner in Community Children's Nursing who is a member/leader of a multi-disciplinary/multi-agency team; work from a health and well-being - focused perspective recognising health as a positive resource and life-long process. The opportunity to achieve competencies in relation to the search for and stimulation of awareness of health needs, influencing policies affecting health and facilitating health enhancing activities. The opportunity to develop the knowledge and understanding they will require to enable them to meet the needs of neo-nates, children, young people and families at, or closer to home; this will include children and young people who have acute health care needs as well as those with long term conditions, disabilities or palliative care needs. An appreciation of the importance of effective discharge planning to support the provision of seamless care between hospital and home. An understanding of life-course transitions and the additional support children and young people with continuing care needs will require during their journey from birth to young adulthood and transitions between services. An understanding of their roles and responsibilities in safeguarding children and young people and promoting their mental health and well-being. Opportunity to develop the ability to use a continuum of public health practice within their role. An awareness of the importance of addressing health inequalities through the re-orientation of existing services and the planning and provision of new ones. Practice experiences that are relevant, underpinned by the philosophy of the programme and enable the student to develop clinical effectiveness and deliver high quality health care. Opportunities to meet the competencies of the offered Specialist Practitioner in Community Children's Nursing fields of practice. A dynamic and high quality educational experience relevant to the Specialist Practitioner in Community Children's Nursing. Opportunities to work in a critical, analytical and reflective manner and to provide them with the opportunity to acquire life-long learning skills. Graduate skills and knowledge to lead, innovate and contribute to the evidence base of practice. Opportunities to develop their leadership qualities and abilities in a range of complex settings and contexts. Cognitive and practical abilities to continue to develop a level of critical and strategic thinking, which can be communicated to others in order to enable them to work successfully with uncertainty. Skills and expertise necessary to develop as inspirational role models and mentors of other practitioners seeking to achieve higher levels of competency in Community Children's Nursing as well as agents of change in the development of Community Children's Nursing Services.

## Learning Outcomes

Code	Description
PLO1	Critically examine the role and responsibilities of the Specialist Practitioner :Community Children's Nursing
PLO2	Analyse and interpret the legal and ethical frameworks in which the Specialist Practitioner: Community Children's Nursing works.

PLO34	Recognise the value of working with other professionals, agencies and stakeholders to deliver, develop and enhance services for children, young people and families.
PLO35	Critically examine the principles and practice of nurse prescribing (for eligible students)

## Programme Structure

### Programme Structure Description

The programme for this award is delivered at level 6 (undergraduate). The programme is offered as full-time (40 weeks) unless the student is undertaking the optional V300 Independent and Supplementary Non-Medical Prescribing when it will be 52 weeks full-time. The course is 50% theory and 50% practice. The Practice Evidence Tool (PET) provides the underpinning framework for students to demonstrate competence for the duration of the programme. The PET structures learning in practice and provides the opportunity to identify practice learning opportunities which will meet the agreed NMC competences. The PET must be passed in order to complete the full programme and achieve the recordable NMC qualification. In addition to the 120 credits at level 4 and 120 credits at level 5 required to enter the programme, students may be awarded up to 40 credits RP(EL) at level 6. Students who wish to undertake V300 Independent and Supplementary Non-Medical Prescribing, as part of their Specialist Practitioner Community Children's Nurse BSc Hons Programme must have at least one years' post registration experience. Students wishing to undertake this module must also be deemed competent by, and obtain permission from their employer. Successful completion of V300 Independent and Supplementary Non-Medical Prescribing, will enable the student to exit with the V300 Independent and Supplementary Non-Medical Prescribing qualification, recordable with the Nursing and Midwifery Council. The V300 qualification must be recorded within 12 months of completing the programme of study.

<b>Programme Structure - 160 credit points</b>	
<b>Level 6 - 160 credit points</b>

### Approved variance from Academic Framework Regulations

Variance

A variance has been approved for 6021HEAL - Paediatric clinical examination and minor illness module has a practice competency element (OSCE) which must be satisfied prior to the release of credit for the module. Students who do not pass the competency will be deemed to have failed that attempt at the module

A variance has been approved for 6100NPAPP that all components of the module must be passed including those contained within the practice competency. The examination element (weighted at 40%) has a pass mark of 80%. The numeracy assessment (written examination) within the practice / competency element has a pass mark of 100%

## Teaching, Learning and Assessment

Practice Assessment; Essays; Community Health Needs Assessment; OSCEs; Exams ; Research Proposal ; Transition or Discharge Plan and Presentation; Case Study ; Service Development Project Interactive lectures and presentation, including video, practice related activities, informal quizzes, tutorials, seminars, group exercises, enquiry based learning techniques, learning through practice, simulation, Canvas and email, self directed study, use of reflective diary.

## Opportunities for work related learning

Students will spend 50% of the programme in practice within the sponsoring/seconding NHS organisation. They will have an identified Practice Assessor/Practice Supervisor who will support and assist the student to meet their learning needs, and who will assess competency. Students are supernumerary during their practice placement.

## Entry Requirements

Type	Description
------	-------------

Alternative qualifications considered

120 credits at level 4 (usually demonstrated by current registration with NMC) 120 credits at level 5 either through study or RPEL, against this programmes stated level 5 learning outcomes (see below) Or a DipHE in Nursing. Additional requirements: Professional Requirements Must be a children's nurse on the NMC register, with a minimum of 1 years post registration experience. Students who wish to undertake V300 during the programme must also be a children's nurse on part one of the NMC register, with a minimum of 1 years post registration experience. Students must be seconded or sponsored by an NHS organisation. Recruitment: A co-ordinated approach to recruitment is established between the local NHS organisations and Liverpool John Moores University. Confirmation of satisfactory references and DBS check are also required. In the case of RP(E)L, the applicant should demonstrate the following level learning outcomes FHEQ Level 4: Demonstrate knowledge of the underlying concepts and principles associated with their field within nursing/midwifery professional practice and an ability to evaluate and interpret these within the context of that area of study or practice. Demonstrate an ability to present, evaluate and interpret an appropriate evidence base in order to develop lines of argument and make sound judgements in accordance with basic theories and concepts within nursing practice. Utilise different approaches to solving problems related to their area(s) of study and/or work- based practice. Communicate the results of their study/work accurately and reliably, and with structured and coherent arguments. Demonstrate the values, qualities, specific and transferable skills necessary for employment in their field of practice and exercise an appropriate level of personal responsibility in line with the relevant standards set out by the Nursing & Midwifery Council. Have established a basis for further education, training and personal development planning and ability to develop new skills within a structured and managed environment. FHEQ Level 5 Demonstrate knowledge and critical understanding of the well-established principles of nursing / midwifery service provision. Have developed a sound understanding of the values, principles qualities, specific and transferable skills in nursing / midwifery, and have applied them in the context of either academic or professional practice. Use a range of established techniques to initiate and undertake critical analysis of information, and to propose solutions to problems arising from that analysis. Effectively communicate information, arguments and analysis in a variety of forms to specialist and non-specialist audiences, and deploy key techniques of the discipline effectively. Have learned to evaluate the appropriateness of different approaches to solving problems. Demonstrate that they have undertaken further training, developed existing skills and acquire new competences that will enable them to assume significant responsibility within organisations. Reflect with insight on own personal, academic and professional development or practice. Exercise personal responsibility and decision-making in line with the relevant standards set out by the Nursing & Midwifery Council.

## Extra Entry Requirements
