Teaching, Learning and Assessment

The acquisition of core knowledge is achieved through a range of teaching methods including lecture, seminar, tutorial and workshop. The core knowledge and understanding required for the programme determines the teaching methods used within modules. For example, lectures may be used to introduce core theories and concepts, with seminars, tutorials and workshops being utilised to build on core theories and explore in more detail further concepts, ideas and 'real-world' business issues. The ability for students to consolidate their learning has been considered and developed within modules. As well as potentially using workshops, tutorials and seminars to practice and further explore theories and concepts, students will also develop their learning through on-line activities and directed reading. In formulating the assessment strategy, the programme team aims to achieve an appropriate match between teaching and learning methods and assessment tasks in order to ensure that the programme offers variety in its assessment. The provision of formative assessment and feedback has also been considered within modules in order to provide students with the best opportunity to develop their knowledge and understanding of key subjects. Assessment methods for the programme include a combination of formative and summative practical exercises and activities, portfolios, presentations, research case-study, posters, reflection, tests, essays, and reports.

Opportunities for work related learning

Work based learning: Learning about self and others. Learning and practicing key skills in management and HRM specifically. Experiencing the world of work. Developing solutions to work based problems in workshops and tutorials. Experience and learning how to manage oneself in a range of situations. Encourage students to engage with the development of employability skills by completing a self-awareness statement.

There is on-going development of graduate skills embedded in the programme. Work related skills form part of workshop and tutorial tasks throughout the programme. Specialist speakers at appropriate points in key modules enhance the work related experience for the students.

Level Four: The Business and Finance module will give HR students a wider understanding of other functions and the ability to work effectively with budget and forecast data.

Level Five: Particular reference is made to Professional Practice at level five where students are exposed to real work simulations which develop a range of skills. Assessment for Professional practice involves the interpretation and offering of solutions to a real world based case study.

Students work in a HRM related job. They enter into a learning agreement between themselves and their employer and LBS concerning their personal and business skills development. Students produce learning logs which are assessed by LJMU and work-based supervisors.

Level Six: Through the investigative report, students research either a live HR business problem connected to a company or research a HR business related issue. The research is undertaken individually with support from supervision and written up as a 8,000 word analytical report.

PDP and CPD planning forms part of the overall development of individual students on the programme and in Strategic HRM - students analyse a range of HRM strategy problems using case studies which focus on the development of work related skills. Students are encouraged to participate in skills development and to collect work related evidence for HR behavioural mapping from level one onwards.

Entry Requirements

Type	Description
GCSEs and equivalents	GCSE (or O Level) Mathematics and English Language grade C or above (or equivalent).
BTECs	104 UCAS Tariff points
Irish awards	104 UCAS Tariff points with a maximum 20 UCAS Tariff points from Ordinary level
