

PROGRAMME SPECIFICATION

Bachelor of Science with Honours (Fnd) in Psychology

| | |
|---|--|
| Awarding institution | Liverpool John Moores University |
| Teaching institution | LJMU |
| UCAS Code | S004 |
| JACS Code | C810 |
| Programme Duration | Full-Time: 4 Years, |
| Language of Programme | All LJMU programmes are delivered and assessed in English |
| Subject benchmark statement | Psychology |
| Programme accredited by | British Psychological Society |
| Description of accreditation | Accredited against the requirements for the Graduate Basis for Chartered Membership (GBC) of the British Psychological Society (BPS). http://www.bps.org.uk/careers-education-training/accredited-courses-traini |
| Validated target and alternative exit awards | Bachelor of Science with Honours (Fnd) in Psychology Bachelor of Science with Honours (SW) (Fnd) in Psychology Diploma of Higher Education (Fnd) in Psychology Diploma in Higher Education (SW) (Fnd) in Psychology Certificate of Higher Education (Fnd) in Psychology |
| Programme Leader | Ross MacDonald |

Educational aims of the programme

In line with the defining principles laid down in the benchmarking document, the aims of the BSc (Hons) Psychology programme are to:

Develop knowledge and critical understanding of a range of fundamental psychological theory.

Produce a scientific understanding of mind, brain, behaviour, and experience, and of the complex interactions between them.

Develop knowledge of, and the ability to critically evaluate, experimental methods and key research areas in psychology.

Develop students' awareness of a range of real-life applications of psychological theory.

Enable students to link theoretical analysis with empirical enquiry.

Enrich students' learning experiences and to provide a stimulating and effective learning environment.

Promote access to higher education, especially within the local region, whilst maintaining due regard for issues of ability and quality assurance.

Enable graduates to enter employment in a wide range of contexts.

To encourage students to engage with the development of employability skills by completing a self-awareness statement.

Enable achievement of Graduate Membership (GM) and Graduate Basis for Chartered Membership (GBC) from the British Psychological Society (BPS). GBC is a pre-requisite for entry to BPS-accredited postgraduate programmes in Psychology.

Alternative Exit/ Interim Award Learning Outcomes - Certificate of Higher Education (Fnd)

A student who is eligible for this award will be able to:

- Demonstrate progression in the transition to degree level study
- Communicate effectively in written and verbal forms
- Show ability to participate in group work discussion
- Apply the skills required for research design and development
- Develop foundational knowledge for core psychology
- Reflect on the psychological skills and literacies required for course mastery and employability
- Evaluate academic, personal and professional progress

Alternative Exit/ Interim Award Learning Outcomes - Diploma in Higher Education (SW) (Fnd)

A student who is eligible for this award will be able to:

A student who successfully completes a placement year will be eligible for the Sandwich award and will, in addition to the requirements for a Diploma of Higher Education (Fnd), be able to demonstrate the professional and personal skills necessary for effective employment within a professional environment.

Alternative Exit/ Interim Award Learning Outcomes - Diploma of Higher Education (Fnd)

A student who is eligible for this award will be able to:

- Demonstrate increased knowledge and understanding of core psychology
- Compare and contrast a range of psychological perspectives
- Evidence competence and progress in understanding research methodologies
- Evaluate the application of psychological perspectives to the work environment
- Demonstrate a critical approach to literature and research findings

Alternative Exit/ Interim Award Learning Outcomes - Bachelor of Science with Honours (SW) (Fnd)

A student who is eligible for this award will be able to:

A student who successfully completes a placement year will be eligible for the Sandwich award and will, in addition to the requirements for a Bachelor of Science with Honours (Fnd), be able to demonstrate the professional and personal skills necessary for effective employment within a professional environment.

Target award Learning Outcomes - Bachelor of Science with Honours (Fnd)

A student successfully completing the programme of study will have acquired the following subject knowledge and understanding as well as skills and other attributes.

A student who is eligible for this award will be able to:

1. Demonstrate a range of knowledge in conceptual and historical perspectives in psychology
2. Explain the basic principles of Biological Psychology
3. Demonstrate breadth of knowledge in basic Cognitive Psychology
4. Demonstrate breadth of knowledge in basic Developmental Psychology
5. Demonstrate breadth of knowledge in basic Social Psychology
6. Demonstrate breadth of knowledge in the basics of Personality and Individual Differences
7. Demonstrate breadth of knowledge in the basic principles and processes of Research methods in psychology
8. Demonstrate basic competence in Psychological Applications
9. Demonstrate and explain the basics of other specialist areas of Psychology
10. Demonstrate competence in effective oral and written communication skills
11. Show evidence of effective comprehension skills and use of data
12. Demonstrate effective critical thinking and reasoning skills
13. Present clear evidence of problem solving skills
14. Demonstrate management of the data collection process and critical competence in research skills

15. Provide evidence of evaluative and analytical skills
16. Demonstrate competence in the effective retrieval and organisation of information
17. Show versatility and understanding in the use a variety of psychological tools, including specialist software, laboratory equipment and psychometric instruments
18. Demonstrate project management skills in carrying out an extensive piece of independent empirical research, applying skills of choosing and applying appropriate advanced empirical methodologies and the treatment of resulting data with appropriate analytical methods
19. Apply skills of literature search, critical review and selection of relevant sources, and systematic synthesis and treatment of key material
20. Demonstrate adaptability and versatility in computer literacy, both in use of standard software applications and use of internet to search for information
21. Show adaptation of problem solving and reasoning skills to a range of challenges
22. Demonstrate versatility in the application of self-management of learning, utilising time-management skills and effective planning strategies
23. Show evidence for collaboration and co-operation in working with others in varied situations

Teaching, Learning and Assessment

The methods used to enable outcomes to be achieved and demonstrated are as follows:

Lectures and directed independent reading are used to introduce core knowledge. Lectures are supported by appropriate learning resources and learning activities to provide practice in applying declarative knowledge to applied problems, with feedback from tutors and peers. Lectures are supplemented by seminar and workshop activities in which students can explore ideas in more depth and contribute to, and benefit from, peer learning. In the Foundation Year, students benefit from weekly workshops first on academic skill development and then on research skills. As the programme develops, students are increasingly expected to cover substantive course content through their own directed reading. Individual supervision sessions are used to support students in the development and completion of their final year project. These approaches are consistent with the learning outcomes of each specific module.

In formulating the assessment strategy, the programme team aims to achieve an appropriate match between teaching and learning methods and assessment tasks, including the provision of formative feedback, an appropriate balance of assessment tasks over the programme, and inclusivity of a range of student approaches to learning. Assessment methods include essay assignment, conventional written examinations (using seen or unseen questions), multiple choice examinations, portfolios, oral presentations and research reports. In the Foundation Year, the assessments are designed to give students experience of all the different types of assessment used later in the programme.

Students have a variety of opportunities for feedback on their work. Workshop activities provide a forum for skill development through practice with feedback from tutor and peers. Individual supervision meetings support students in developing, conducting and reporting an empirical investigation in psychology. Coursework assessment is used to provide timely and detailed summative and formative assessment. Individual tutors also build in opportunities for formative assessment during the life of the module, and take advantage of opportunities to provide formative assessment that arise from students' work.

Programme structure - programme rules and modules

The BSc (Hons) Psychology degree is accredited by the British Psychological Society and confers graduate eligibility for both Graduate Membership of the British Psychological Society and the Graduate Basis for Chartership, provided the minimum standard of a Second Class Honours is achieved. In addition, the student must achieve a mark of 40% or more in the psychology dissertation (6200PSYSCI).

Two 10-credit options must be chosen at level 6, but no more than two.

The undergraduate programme in Psychology provides a clear developmental progression in learning.

At Level 4 students are given a theoretical and practical grounding in research and study skills, including IT, and are introduced to a range of key theories and research findings in psychology. At Level 5, there is a more in-depth and critical examination of experimental methods, including computer applications in data collection and analysis. Other core modules at Level 5 provide a broad mainstream education in psychology, whilst the applied nature of the programme is traceable through the modules, "Studying Psychology" at level 4, and "Careers and Employability" at level 5. The emphasis at Level 6 is on providing the opportunity to study selected areas of Psychology in greater depth and from a more critical and evaluative perspective. The flexible system of choice at this level enables students to create a broad or more specialised portfolio of modules according to their own interests and career aspirations. Investigative and research skills are further enhanced by completion of an independent piece of empirical research in the Dissertation module.

Students have the option to undertake a placement year. The placement year, module (5210PSYSCI), will follow Level 5 and students will be enrolled on a 600 credit honours sandwich programme. The Level 5 mean for the final award mark will be calculated based upon the 240 credits at Level 5. Students successfully completing the assessment of the placement year are eligible for a Sandwich award.

Students not undertaking a placement year are registered on the non-sandwich version of the programme and will have the opportunity of an additional study year abroad following Level 5. Students will be enrolled on a 600 credit honours with study abroad programme. Of those 600 credits, 120 will be taken via a Level 5 study abroad module [5208PSYSCI].

The modules to be studied in the host institution must be agreed in advance. The Level 5 mean for the final award mark will be calculated based upon the 240 credits at Level 5.

| Level 6 | Potential Awards on completion | Bachelor of Science with Honours (Fnd) |
|--|--|--|
| Core | Option | Award Requirements |
| 6200PSYSCI PSYCHOLOGY DISSERTATION (40 credits) | 6201PSYSCI FORENSIC AND INVESTIGATIVE PSYCHOLOGY (20 credits) 6202PSYSCI HEALTH PSYCHOLOGY (20 credits) 6203PSYSCI COGNITIVE NEUROSCIENCE (20 credits) 6204PSYSCI POSITIVE PSYCHOLOGY (20 credits) 6205PSYSCI PSYCHOLOGY IN EDUCATION (20 credits) 6206PSYSCI PSYCHOPHARMACOLOGY AND ADDICTIVE BEHAVIOUR (10 credits) 6207PSYSCI FACE PERCEPTION: PROCESSES AND DISORDERS (10 credits) 6208PSYSCI SOCIAL COGNITION (10 credits) 6209PSYSCI FUNCTIONS OF HUMAN SLEEP (10 credits) 6210PSYSCI WORK PSYCHOLOGY (10 credits) 6211PSYSCI EXPERIMENTAL PSYCHOLOGY (20 credits) 6212PSYSCI PSYCHOLOGY OF SEXUAL VIOLENCE (10 credits) 6213PSYSCI Work-based learning (10 credits) | 40 core credits at level 6 80 option credits at level 6 |

Information about assessment regulations

All programmes leading to LJMU awards operate within the University's Academic Framework.
<https://www.ljmu.ac.uk/about-us/public-information/academic-quality-and-regulations/academic-framework>

Opportunities for work-related learning (location and nature of activities)

Work-related learning is provided on the modules, Careers and Employability (5205PSYSCI) and Work-based learning (6213PSYSCI).

In 5205PSYSCI, students get an opportunity to develop their career and employability skills through a series of lectures, tutorials, and by completing an oral presentation. There is an option to undertake either a work placement or an enhanced careers-related portfolio. Through the learning activities careers within and outside of Psychology are highlighted and discussed, with reference to the enhancement of students' employability skills. Aims in the module include raising students' awareness of various career paths and opportunities that their Psychology degree opens up for them. Students will complete an oral presentation, which in itself is an essential employability skill. Tutorials within this module will support students in their goal-directed planning for employability.

In 6213PSYSCI, students who choose this module at Level 6 have the opportunity to complete a longer and more in-depth work placement. They can work towards making themselves more competitive in the employment market, and gather further examples of their skills in a workplace context. Students on this module will be supported by tutorials and lectures from academic staff. They will complete a coursework portfolio assessment consisting of a skills matrix and a detailed professional development plan.

Both modules link students to the work of a dedicated Careers Adviser who contributes directly to the programme and assists students with career counselling.

Students have the option to arrange a year's industrial placement between Level 5 and 6.

Criteria for admission

A/AS Level

A minimum of 96 points on the UCAS tariff

BTEC National Diploma

BTEC certificate: Acceptable only when combined with other qualifications

90 credit diploma: Acceptable only when combined with other qualifications

Diploma (QCF): DD if studied on its own or to the total of 96 UCAS points when combined with other qualifications

Extended diploma (QCF): MMM if studied on its own or to the total of 96 UCAS points when combined with other qualifications

AVCE

A minimum of 96 points on the UCAS tariff

Irish Leaving Certificate

Acceptable on its own and combined with other qualifications - 96 UCAS points from a minimum of 5 subjects

Scottish Higher

Acceptable on its own and combined with other qualifications – 96 UCAS points from a minimum of 3 subjects

International Baccalaureate

Acceptable on its own and combined with other qualifications – 24 IB Diploma Points, specific subject grades may be required

Access

Access to Higher Education Diploma: Acceptable on its own and combined with other qualifications – overall Pass required

Other

Prior to starting the programme applicants must have obtained grade 4 or grade C or above in English Language and Mathematics GCSE or • Key Skills Level 2 in English/ Maths • NVQ Level 2 Functional skills in Maths and English Writing and or Reading • Skills for Life Level 2 in Numeracy/English • Higher Diploma in Maths/ English • Functional skills level 2 in Maths/ English

Mature entry

Mature, non standard applicants providing evidence of ability to undertake the programme will be interviewed by the Admissions Team. Access applicants should have (or expect to obtain) the full award in a relevant course.

Overseas qualifications

International students achieving a qualification equivalent to the above (as defined by NARIC) with an English language capability of IELTS 6.0 (minimum of 5.5 in each component) or equivalent.

External Quality Benchmarks

All programmes leading to LJMU awards have been designed and approved in accordance with the UK Quality Code for Higher Education, including the Framework for Higher Education Qualifications in the UK (FHEQ) and subject benchmark statements where applicable.

The University is subject to periodic review of its quality and standards by the Quality Assurance Agency (QAA) Published review reports are available on the QAA website at www.qaa.ac.uk

Programmes which are professionally accredited are reviewed by professional, statutory and regulatory bodies (PSRBs) and such programmes must meet the competencies/standards of those PSRBs.

Support for students and their learning

The University aims to provide students with access to appropriate and timely information, support and guidance to ensure that they are able to benefit fully from their time at LJMU. All students are assigned a Personal Tutor to provide academic support and when necessary signpost students to the appropriate University support

services.

Students are able to access a range of professional services including:

- Advice on practical aspects of study and how to use these opportunities to support and enhance their personal and academic development. This includes support for placements and careers guidance.
- Student Advice and Wellbeing Services provide students with advice, support and information, particularly in the areas of: student funding and financial matters, disability, advice and support to international students, study support, accommodation, health, wellbeing and counselling.
- Students studying for an LJMU award at a partner organisation will have access to local support services

Methods for evaluating and improving the quality and standards of teaching and learning

Student Feedback and Evaluation

The University uses the results of student feedback from internal and external student surveys (such as module evaluations, the NSS and PTES), module evaluation questionnaires and meetings with student representatives to improve the quality of programmes.

Staff development

The quality of teaching is assured through staff review and staff development in learning, teaching and assessment.

Internal Review

All programmes are reviewed annually and periodically, informed by a range of data and feedback, to ensure quality and standards of programmes and to make improvements to programmes.

External Examining

External examiners are appointed to programmes to assess whether:

- the University is maintaining the threshold academic standards set for awards in accordance with the FHEQ and applicable subject benchmark statements
- the assessment process measures student achievement rigorously and fairly against the intended outcomes of the programme(s) and is conducted in line with University policies and regulations
- the academic standards are comparable with those in other UK higher education institutions of which external examiners have experience
- the achievement of students are comparable with those in other UK higher education institutions of which the external examiners have experience

and to provide informative comment and recommendations on:

- good practice and innovation relating to learning, teaching and assessment observed by external examiners
- opportunities to enhance the quality of the learning opportunities provided to students

Please note:

This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content, teaching, learning and assessment methods of each module can be found in module and programme guides.
