

# PROGRAMME SPECIFICATION

---

## Bachelor of Engineering with Honours (Fnd) in Marine and Mechanical Engineering

<b>Awarding institution</b>	Liverpool John Moores University
<b>Teaching institution</b>	LJMU
<b>UCAS Code</b>	1Q34
<b>JACS Code</b>	H300
<b>Programme Duration</b>	Full-Time: 4 Years, Sandwich Thick: 5 Years
<b>Language of Programme</b>	All LJMU programmes are delivered and assessed in English
<b>Subject benchmark statement</b>	Engineering Council UK Spec
<b>Programme accredited by</b>	
<b>Description of accreditation</b>	
<b>Validated target and alternative exit awards</b>	Bachelor of Engineering with Honours (Fnd) in Marine and Mechanical Engineering  Bachelor of Engineering Honours (SW) (Fnd) in Marine and Mechanical Engineering  Diploma of Higher Education (Fnd) in Marine and Mechanical Engineering  Diploma in Higher Education (SW) (Fnd) in Marine and Mechanical Engineering  Certificate of Higher Education (Fnd) in Marine and Mechanical Engineering
<b>Programme Leader</b>	Geraint Phylip-Jones

## Educational aims of the programme

The B.Eng. programme in Marine and Mechanical Engineering is designed to partially fulfill the educational requirements for Chartered Engineer status. It is designed to develop a high level of technical expertise together with the emotional intelligence to be able to practice successfully as a professional engineer in a modern interdisciplinary engineering environment. Graduate engineers are increasingly expected to take on important technical leadership and management responsibilities early in their careers and the knowledge and skills gained from this programme are designed to produce graduates who are able to make an immediate contribution to their employers organisations.

The programme aims to:

- Deliver the educational experience in which students can develop their knowledge of engineering science, core engineering principles and fundamental underpinning subjects such as mathematics and computation.
- Develop students confidence to analyse challenging technical problems and to further develop their core engineering knowledge and skills through the investigation and development of credible and robust solutions.
- Provide students with appropriate support and encouragement to develop the necessary skills such that they can study independently and take responsibility for their own learning and subsequent professional development.
- Provide engineering graduates with a range of highly relevant transferable skills such as team working, communication, management, problem solving, computing and technical computing.
- Provide a programme of study that fully meets the requirements of the Engineering Council's UK Standard for Professional Engineering Competence (UKSpec) and partially qualifies the successful graduate for the attainment of the Engineering Council Chartered Engineer status after completion of an appropriate period of industrial experience.
- Produce graduates with a depth, breadth of knowledge and understanding of mechanical & marine engineering, management and teamwork to enable them to rapidly assume technical leadership and

management roles.

- For students undertaking a placement year the aim is to provide students with an extended period of work experience at an approved partner that will complement their programme of study at LJMU. This will give the students the opportunity to develop professional skills relevant to their programme of study, as well as attitude and behaviours necessary for employment in a diverse and changing environment.

- The programme meets the requirements of the Engineering Councils 'UK Standard for Professional Engineering Competence' (UKSpec).

### **Alternative Exit/ Interim Award Learning Outcomes - Certificate of Higher Education (Fnd)**

*A student who is eligible for this award will be able to:*

Undertake basic mathematical analysis.

Apply the basic principles of applied mechanics, thermodynamics and fluid mechanics, materials science and electrical engineering to simplified engineering problems.

Design and manufacture simple engineering components and assemblies.

Demonstrate key skills appropriate to the professional engineer.

### **Alternative Exit/ Interim Award Learning Outcomes - Diploma in Higher Education (SW) (Fnd)**

*A student who is eligible for this award will be able to:*

Undertake advanced mathematical and computational studies of engineering systems and problems.

Demonstrate the application of intermediate level applied mechanics, thermodynamics and fluid mechanics, and electrical engineering from to the solution of standard engineering problems.

Demonstrate the intermediate engineering skills that will be required for further study.

Demonstrate the intermediate engineering skills that will be required for further study

Demonstrate a competence in technical reporting and an ability to analyse and present engineering data.

Demonstrate the professional and personal skills necessary for effective employment within a professional environment.

### **Alternative Exit/ Interim Award Learning Outcomes - Diploma of Higher Education (Fnd)**

*A student who is eligible for this award will be able to:*

Undertake advanced mathematical and computational studies of engineering systems and problems.

Demonstrate the application of intermediate level applied mechanics, thermodynamics and fluid mechanics, and electrical engineering from to the solution of standard engineering problems.

Demonstrate the intermediate engineering skills that will be required for further study.

Demonstrate a competence in technical reporting and an ability to analyse and present engineering data.

## **Target award Learning Outcomes - Bachelor of Engineering with Honours (Fnd)**

*A student successfully completing the programme of study will have acquired the following subject knowledge and understanding as well as skills and other attributes.*

*A student who is eligible for this award will be able to:*

1. Demonstrate their knowledge and understanding of essential facts, concepts, theories and principles of their engineering discipline, and its underpinning science and mathematics. They must have an appreciation of the wider multidisciplinary engineering context and its underlying principles. They must appreciate the social, environmental, ethical, economic and commercial considerations affecting the exercise of their engineering judgment.

2. Demonstrate a knowledge and understanding of scientific principles and methodology necessary to underpin their education in Marine and Mechanical Engineering, to enable appreciation of its scientific and engineering context, and to support their understanding of historical, current, and future developments and technologies.

3. Illustrate a knowledge and understanding of mathematical principles necessary to underpin their education in Marine engineering and related engineering disciplines and to enable them to apply mathematical methods, tools and notations proficiently in the analysis and solution of engineering problems.

4. Demonstrate an ability to apply and integrate knowledge and understanding of other engineering disciplines to support study of Marine, Mechanical and related engineering disciplines.

5. Understand engineering principles and the ability to apply them to analyse key engineering processes.
6. Illustrate an ability to identify, classify and describe the performance of systems and components through the use of analytical methods and modelling techniques.
7. Demonstrate an ability to apply quantitative methods and computer software relevant to Marine, Mechanical and related engineering disciplines to solve engineering problems
8. Apply appropriate quantitative science and engineering tools to the analysis of problems. They must be able to demonstrate creative and innovative ability in the synthesis of solutions and in formulating designs. They must be able to comprehend the broad picture and thus work with an appropriate level of detail.
9. Demonstrate an understanding of and ability to apply a systems approach to engineering problems.
10. Demonstrate a knowledge and understanding of the commercial and economic context of engineering processes.
11. Illustrate a knowledge of management techniques which may be used to achieve engineering objectives within that context.
12. Understand the requirement for engineering activities to promote sustainable development.
13. Demonstrate an awareness of the framework of relevant legal requirements governing engineering activities, including personnel, health, safety, and risk (including environmental risk) issues.
14. Understand the need for a high level of professional and ethical conduct in engineering.
15. Apply practical engineering skills acquired through, for example, work carried out in laboratories and workshops; in industry through supervised work experience; in individual and group project work; in design work; and in the development and use of computer software in design, analysis and control. Evidence of group working and of participation in a major project is expected.
16. Investigate and define a problem and identify constraints including environmental and sustainability limitations, health and safety and risk assessment issues.
17. Understand customer and user needs and the importance of considerations such as aesthetics.
18. Identify and manage cost drivers.
19. Demonstrate creativity to establish innovative solutions.
20. Illustrate creativity to establish innovative solutions.
21. Ensure fitness for purpose for all aspects of the problem including production, operation, maintenance and disposal.
22. Manage the design process and evaluate outcomes.
23. Demonstrate a knowledge of the characteristics of particular equipment, processes or products.
24. Develop engineering workshop and laboratory skills.
25. Demonstrate an understanding of contexts in which engineering knowledge can be applied (e.g. operations and management, technology, development, etc).
26. Demonstrate transferable skills including problem solving, communication, and working with others, as well as the effective use of general IT facilities and information retrieval skills.
27. Understand the use of technical literature and other information sources.
28. Demonstrate an awareness of nature of intellectual property and contractual issues.
29. Demonstrate an understanding of appropriate codes of practice and industry standards.
30. Illustrate an awareness of quality issues.
31. Demonstrate an ability to work with technical uncertainty.

## Alternative target awards

*A student who is eligible for the following awards will be able to:*

Bachelor of Engineering Honours (SW) (Fnd) in Marine and Mechanical Engineering -

In addition to the above also demonstrate the professional and personal skills necessary for effective employment within a professional environment.

## Teaching, Learning and Assessment

*The methods used to enable outcomes to be achieved and demonstrated are as follows:*

Acquisition of underpinning knowledge is achieved mainly through lectures and directed student-centred

learning. Student-centred learning is used where appropriate resource material is available. Understanding is reinforced through case-studies.

Testing of the knowledge base is through a combination of unseen written examinations, coursework in the form of case-study reports and coursework assignment submissions.

The students must appreciate the social, environmental, ethical, economic and commercial considerations affecting the exercise of their engineering judgement. Acquisition of Intellectual skills is achieved mainly through lectures and direct student-centred learning. Student-centred learning is used where appropriate resource material is available.

Understanding is reinforced through case-studies and assessed via coursework and examination where appropriate.

Engineering design, analysis and practical skills are taught almost exclusively by individual and group project work supported by a lecture programme appropriate to the demands of the project.

Engineering design and practical skills are assessed by individual and group written design project reports, student presentations and presentations using computer graphics.

The economic, Social and Environmental context of engineering operations is delivered by means of lectures and case studies. The use of appropriate case study material is an essential part of teaching in this area.

Assessment is via a combination of unseen written examinations and coursework in the form of case-study reports.

## Programme structure - programme rules and modules

The marks from Level 5 and 6 assessments contribute to the final degree classification i.e. 25% of Level 5 marks and 75% of Level 6.

### Option Modules

Students are required to select two option modules at L6, one from each semester. The options are:-

#### Semester One

Fluid Dynamics and Heat Transfer

Materials Engineering

Manufacturing Processes and Industrial Automation

#### Semester Two

Thermodynamics

Structural Integrity

Dynamics and Control

Students have the option to undertake a placement year. The placement year, module 5113MECH, will follow Level 5 and students will be enrolled on a 600 credit honours sandwich programme. The Level 5 mean for the final award mark will be calculated based upon the 240 credits at Level 5. Students successfully completing the assessment of the placement year are eligible for a Sandwich award.

Students not undertaking a placement year are registered on the non-sandwich version of the programme and will have the opportunity of an additional study year abroad following Level 5. Students will be enrolled on a 600 credit honours with study abroad programme. Of those 600 credits, 120 will be taken via a Level 5 study abroad module 5114MECH. The modules to be studied in the host institution must be agreed in advance. The Level 5 mean for the final award mark will be calculated based upon the 240 credits at Level 5.

Level 6	Potential Awards on completion	Bachelor of Engineering with Honours (Fnd)
Core	Option	Award Requirements
6101MECH Engineering Project (40 credits) 6102MECH Engineering Analysis (20 credits) 6104MECH Industrial Management (20 credits) 6105MECH Marine Design and Propulsion (20 credits)	6108MECH Fluid Dynamics and Heat Transfer (10 credits) 6109MECH Thermodynamics (10 credits) 6110MECH Materials Engineering (10 credits) 6111MECH Structural Integrity (10 credits) 6112MECH Manufacturing Processes and Industrial Automation	100 core credits at level 6 20 option credits at level 6

	(10 credits) 6113MECH Dynamics and Control (10 credits)	
Level 5	Potential Awards on completion	
Core	Option	Award Requirements
5102MECH Engineering Mathematics 2 (10 credits) 5103MECH Materials and Processes (10 credits) 5104MECH Applied Mechanics 2 (20 credits) 5105MECH Thermodynamics and Fluid Mechanics 2 (20 credits) 5107MECH Engineering Practice 2 (20 credits) 5109MECH Marine Electrical Systems (20 credits) 5110MECH Marine Design and Technology (20 credits)		120 core credits at level 5 0 option credits at level 5
Level 4	Potential Awards on completion	
Core	Option	Award Requirements
4101MECH Engineering Mathematics 1a (10 credits) 4102MECH Engineering Mathematics 1b (10 credits) 4103MECH Applied Mechanics 1 (20 credits) 4104MECH Thermodynamics and Fluid Mechanics 1 (20 credits) 4105MECH Materials (20 credits) 4106MECH Engineering Practice 1 (20 credits) 4107MECH Electrical and Electronic Engineering (20 credits)		120 core credits at level 4 0 option credits at level 4
Level 3	Potential Awards on completion	
Core	Option	Award Requirements
3100FNDET Algorithms and Computing (10 credits) 3101FNDMEC Engineering and Technology Practice (20 credits) 3102FNDET Foundation Mathematics for Engineering and Technology 1 (20 credits) 3103FNDET Foundation Mathematics for Engineering and Technology 2 (20 credits) 3106FNDET Programming (10 credits) 3107FNDET Introductory Foundation Physics (20 credits) 3108FNDET Additional Foundation Physics (20 credits)		120 core credits at level 3 0 option credits at level 3

## Information about assessment regulations

All programmes leading to LJMU awards operate within the University's Academic Framework.  
<https://www.ljmu.ac.uk/about-us/public-information/academic-quality-and-regulations/academic-framework>

## Opportunities for work-related learning ( location and nature of

## activities)

Students are encouraged to undertake a year's industrial placement between Level 5 and 6. There is a further opportunity to undertake summer placements between academic years to gain valuable industrial experience.

There are also opportunities to complete industrially based projects via individual engineering projects at Level 6.

This work experience will help develop understanding of the world of work environment suitable for the programme and increase a student's professional practical skills.

## Criteria for admission

### **A/AS Level**

Applicants should have or expect to obtain a total of 88 UCAS points, of which at least 20 should come from A2.

### **BTEC National Diploma**

BTEC Extended Diploma

To the value of 88 UCAS points

BTEC Diploma / 90 Credit Diploma / Subsidiary Diploma / Certificate

To the value of 88 UCAS points when combined with other qualifications.

### **AVCE**

Applicants should have or expect to obtain a total of 88 UCAS points overall.

### **Irish Leaving Certificate**

Applicants should have or expect to obtain a total of 88 UCAS points overall.

### **Scottish Higher**

Applicants should have or expect to obtain a total of 88 UCAS points overall.

### **International Baccalaureate**

Applicants should have or expect to obtain a total of 88 UCAS points overall.

### **Other**

Qualifications deemed equivalent to the above upon completion of appropriate assessment will be considered acceptable.

Applicants should have five GCSE (or equivalent) passes of at least grade C including Mathematics and English (or IELTS 6.0).

### **Mature entry**

Mature applicants will be considered on a case-by-case basis. The admissions team will be particularly concerned with the length of time since any relevant academic study and relevant background from work experience or 'Access' courses.

Admissions to the Foundation Year will follow the University Admissions policies on widening participation, equal opportunities, and students with disabilities.

### **Overseas qualifications**

Applicants offering other awards will be considered on an individual basis in line with the agreed entry criteria.

## External Quality Benchmarks

All programmes leading to LJMU awards have been designed and approved in accordance with the UK Quality Code for Higher Education, including the Framework for Higher Education Qualifications in the UK (FHEQ) and subject benchmark statements where applicable.

The University is subject to periodic review of its quality and standards by the Quality Assurance Agency (QAA). Published review reports are available on the QAA website at [www.qaa.ac.uk](http://www.qaa.ac.uk)

Programmes which are professionally accredited are reviewed by professional, statutory and regulatory bodies (PSRBs) and such programmes must meet the competencies/standards of those PSRBs.

## Support for students and their learning

The University aims to provide students with access to appropriate and timely information, support and guidance to ensure that they are able to benefit fully from their time at LJMU. All students are assigned a Personal Tutor to provide academic support and when necessary signpost students to the appropriate University support services.

Students are able to access a range of professional services including:

- Advice on practical aspects of study and how to use these opportunities to support and enhance their personal and academic development. This includes support for placements and careers guidance.
- Student Advice and Wellbeing Services provide students with advice, support and information, particularly in the areas of: student funding and financial matters, disability, advice and support to international students, study support, accommodation, health, wellbeing and counselling.
- Students studying for an LJMU award at a partner organisation will have access to local support services

## **Methods for evaluating and improving the quality and standards of teaching and learning**

### **Student Feedback and Evaluation**

The University uses the results of student feedback from internal and external student surveys (such as module evaluations, the NSS and PTES), module evaluation questionnaires and meetings with student representatives to improve the quality of programmes.

### **Staff development**

The quality of teaching is assured through staff review and staff development in learning, teaching and assessment.

### **Internal Review**

All programmes are reviewed annually and periodically, informed by a range of data and feedback, to ensure quality and standards of programmes and to make improvements to programmes.

### **External Examining**

External examiners are appointed to programmes to assess whether:

- the University is maintaining the threshold academic standards set for awards in accordance with the FHEQ and applicable subject benchmark statements
- the assessment process measures student achievement rigorously and fairly against the intended outcomes of the programme(s) and is conducted in line with University policies and regulations
- the academic standards are comparable with those in other UK higher education institutions of which external examiners have experience
- the achievement of students are comparable with those in other UK higher education institutions of which the external examiners have experience

and to provide informative comment and recommendations on:

- good practice and innovation relating to learning, teaching and assessment observed by external examiners
- opportunities to enhance the quality of the learning opportunities provided to students

### **Please note:**

*This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content, teaching, learning and assessment methods of each module can be found in module and programme guides.*
